

Sinclair Broadcasting wanders onto my TV screen like a drunken father through the front door at 3 am; he epitomizes fear and ignorance and must be stopped.

Sinclair abuses public airwave privileges without the public's good interests in mind. I believe he is a threat to the standard of democracy that I and most other citizens regard highly. Instead of local issues with real people involved we (the public of America) are spoonfed vague political garbage containing little more than a grain of truth.

Rules pertaining to media need to be created and implemented. I implore you, fine members of the FCC, please examine the situation. If you find no fault in Sinclair's actions, then so be it. Thank you for your time to read my humble plea. I am truly blessed to live in a land where I can speak my mind. May God guide and bless you when you need strength.
